Brief Description of Astro Sculptor case

Good afternoon Sir(s),

In conjunction with the already sent ECA Fuel Oil NON-Availability form, we would like to submit to you the following brief report explaining this case for your review.

Various supporting documents and messages are also attached herein.

BRIEF REPORT :

Vessel sailed from Mobile, Al on June 6th, 2016 at 20:48 hrs It with 221 mtons LSMGO on board and proceeded with very economical speed to SWPass anchorage awaiting orders for her next employment. Vessel was within ECA. There was a contact for LSMGO offshore delivery but there was no availability up to June 9th, 2016 at the area.

On June 8th, 2016 at 11:30 hrs It, vessel was fixed to load from Dos Bocas, Mexico and discharge at Port Arthur, Tx. Vessel sailed immediately off ECA area to save her LS bunkers and proceeded to loading port as bunkers were calculated enough for this voyage. We also fixed bunkers for discharge port Port Arthur, Pleasure Island terminal as Dos Bocas, Mexico is an offshore loading SBM where there is no bunker availability.

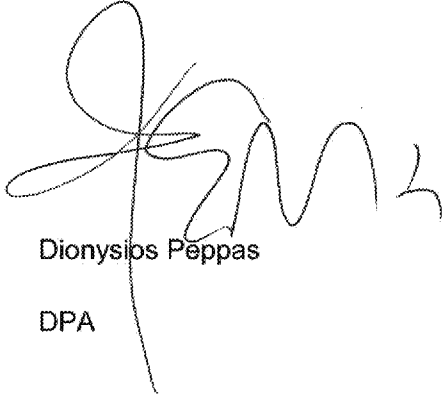

Vessel entered ECA zone on June 16th, 2016 and arrived at Sabine anchorage on June 17th, 2016 at 23:42 hrs It with 133,7 mtons LSMGO which were quite enough to wait at anchor for 6 days (as anticipated by agents) and reach the discharge dock where she expected to receive 500 mtons LSMGO.

However, on June 23rd, 2016 vessel received orders by charterers that discharge dock changed to Sun, Nederland; we immediately notified suppliers but bunkering is not permitted alongside this dock. We tried through agents to gain special permission with no success. We tried to bring the vessel up river laden to take bunkers at Upper Sun anchorage but charterers never gave permission for; additionally due to limited draft, anchorage width it was too risky. Finally we fixed bunkering after completion of discharge at Fina anchorage however, vessel's LSMGO is marginal; she can complete discharge BUT is uncertain whether she will have enough LS or not to reach Fina Anchorage.

Vessel scheduled to proceed upriver tomorrow June 27th, 2106 with about 75 mtons LSMGO on board; she will complete her discharge and IF required she will have to use HS fuel oil to reach Fina Anchorage. Estimated time required before switch over to LSMGO again is about 3 hours.

We hereby request your permission to proceed with the above plan.

Yours Faithfully,

A handwritten signature in black ink, appearing to be 'Dionysios Peppas', written over a vertical line that extends from the signature down towards the 'DPA' text.

Good day Capt. Nikolados

Further to our previous message, kindly be advised that we have contacted Sunoco Logistics and requested permission for a bunker barge to be alongside the Astro Sculptor after completion of discharging in order to deliver a small amount of bunkers. Sunoco Logistics declined our request, however they are offering us Upper Sun Anchorage for 24 hours period on June 26th or June 29th for the amount of \$8,000.

Best regards

Good afternoon,

Supplier cant supply at sun supplier suggested they take this at anchorage inbound or out. Best idea would be to have agent look to possibilities and communicate with our ops team.of supplier

Please ket me know

Good evening Captain Nikos,

Thank you for the swift response expecting to hear that the ex pipe line services terminated last year, but we made an effort via barge supply.

Let us work on alternative scenarios and shall keep your esteemed agency well posted of developments.

Best regards

Dimitrios N. Kosmas

Re: M/T Astro Sculptor Bunkering

Good evening Capt. Kosmas

That very much message received noted, however kindly be advised that Sun Oil terminal will not allow any bunkering via barge nor have bunkers ex pipe line

Best regards

Good morning Christian,

due to long vessel's stay at anchorage and taking into consideration all safety factors of forthcoming approach upriver and cargo operation, we kindly request charterers' consent to allow vessel to transit upriver on 26th and stay at Upper Sun Anchorage for bunkering.

Owners have already fixed stem for Valero Pi terminal however, terminal changed yesterday to Sunoco Logistics which denied bunkering request; in this respect it is imperative to receive bunkers before situation becomes critical.
Vessel will be anyway ready for berthing if she called on 27th.

Thanking you in advance for your valuable understanding.
